MOTIVATION

I'm enthusiastic about the blockchain ecosystem that the reason why I would like to integrate a blockchain company.

As I like challenges and I'm very motivated also, I've decided to learn and develop my technical skills in this field. I will bring a good spirit and will be fully dedicated into the projects and missions I will be assigned to.

HOBBIES

I use protocols of different blockchains on a daily basis. For instance, I do a blockchain technological watch via youtube, twitter and Medium

I practice Multi Martial Art and play chess.

I've attended the Paris Blockchain Week summit 2022 hackathon where I won a Dominance venture prize with a Nft Tickets project.

SKILLS

HARD SKILLS : Python, Solidity, Javascript, ethers/web3, Hardhat/Truffle, SQL, GraphQL, Angular, react, aws amplify/lambda, J2E, C#, git.

SOFT SKILLS: Agile Method- Learn to dialogue decide to help each other act in Collective Intelligence.

Langue : french native, spanish native, English (toeic 700).

EDUCATION

ESILV - Ecole Supérieur d'Ingénieur Léonard de Vinci - La Défense

Major Fintech 2020-2023

Blockchain programming, Cryptocurrency market, Cryptography, Web Development, Machine Learning, Datascience and Statistics courses.

Weeks training of Soft Skills, entrepreneurial projects.

Lycée Honorée de Balzac - 75017

PCSI/PC 2017-2019

Chemistry Olympiad.

TIPE project which takes place part of a thesis on hydrophobic surfaces at the Institut Pierre Gilles-de-Gennes (liquid infused surfaces).

WORK EXPERIENCE

Full-stack Software Developer

Prepar-Vie 2021

Elaboration and implementation of a workflow solution, in autonomy. Collection of needs and expectations, reporting, specification sheets, UI/UX, Bdd schema, Rest API, development of an application, tests.

Self entrepreneurship

Phone repair business/shop on rakuten website 2018-2020

Budget management, customer/supplier relationships, marketing management - targeting, social network management, technical repair.

PROJECTS

Whale watching on Ethereum Blockchain

This project consists of analyzing the ethereum blockchain to identify MATIC whales and track their movements. Development of a dashboard allows the use of our work and give a deep and easy understanding of our results to a random user.

Blockchain programming trainings

- Creation of smart contracts allowing the manipulation of ERC20, ERC721 and interactions with Uniswap, AAVE, Compound, Chainlink analysis of documentation and open source codes on github.
- Development of a dapp.
- Use of Binance api.

Cryptocurrency Price Prediction

Bitcoin price prediction with deep learning using the LSTM method, analysis of external variables, backtests on the price history.
